

Prepare

Plan your operations and leave nothing to chance with our detailed weather forecasts

Whether you're assessing the risk of a rescue mission, or organising logistics for a passenger trip, the success of your operation is reliant on the right weather conditions for flying.

Met Office Specialist Aviation

Airport warnings

Click on a warning to view details of that warning.
Click on an airport name to display all current warnings for that airport (only if warnings are in force at that airport).
Only the data visible for the airport you are viewing is displayed in the table.
This page is for information only. It does not constitute a forecast or a guarantee of any kind.
This page will automatically refresh every 5 minutes.

Preparation is crucial. Our specialist aviation service provides all your essential weather information in one place, giving you convenient, easy access to changing conditions up to five days in advance.

WEATHER INFORMATION FOR SPECIALIST FLIERS

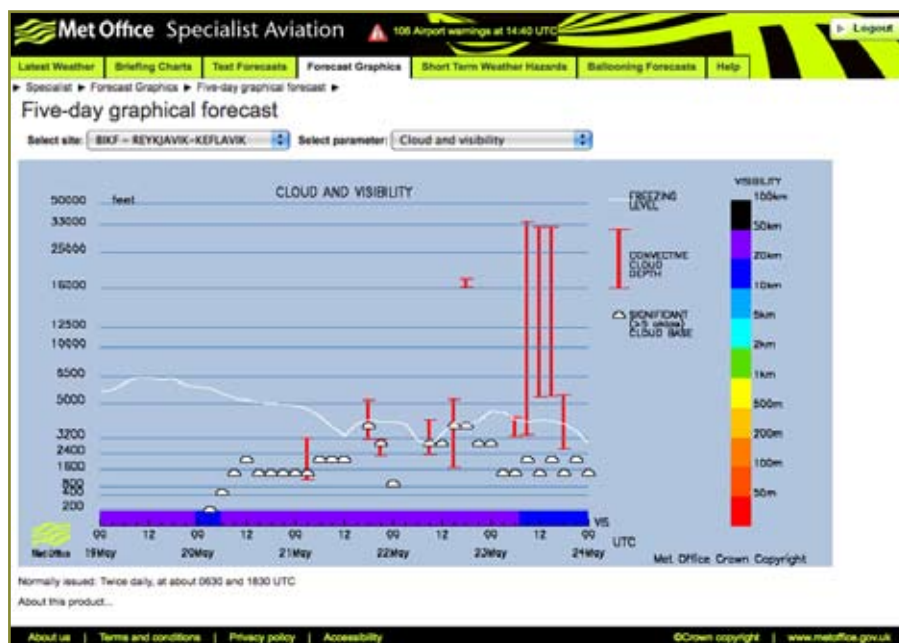

When it comes to aviation weather forecasting, the Met Office is second to none – both in the UK and worldwide. Our new cost-effective subscription service offers current weather and forecasts to aviators who operate from small aerodromes or non-airport locations on specialist operations such as:

- Commercial balloon flights
- Commercial helicopters
- Police helicopters
- Air ambulance
- Search and rescue
- Small aerodromes and airfields
- General aviation clubs, associations and flying schools

CURRENT AND FORECAST WEATHER

Our new specialist service can help you prepare for flights by providing a range of interactive maps showing low-level current and forecast weather information. Planning features include a new five day graphical forecast of cloud and visibility, pressure, temperature and rainfall.

Latest weather observations from remote locations are also available for those all important final checks. This integrated service offers all the information you need, all in one place to make informed, safe decisions.

Met Office
FitzRoy Road, Exeter
Devon, EX1 3PB
United Kingdom

Tel: 0870 900 0100
Email: aviation@metoffice.gov.uk
www.metoffice.gov.uk/aviation

FEATURES OF THE SPECIALIST AVIATION SERVICE INCLUDE:

- A range of interactive maps showing low-level current and forecast weather information.
- A five-day graphical forecast of cloud and visibility, pressure, temperature and rainfall data.
- Rainfall satellite, TAFs, METARs.
- All important SYNOP data showing latest weather observations.
- All relevant charts such as UK spot winds (F214), low-level significant weather (F215) and surface pressure charts.
- UK Airmet and three-day planner text forecasts.
- Short term weather hazard information and UK ballooning forecasts.

For more information, or to arrange a demonstration, please call our 24-hour Customer Centre on 0870 900 0100 or email aviation@metoffice.gov.uk
