

# Volcanic Ash – T+0 annotated satellite image

Issued 0930 UTC on Sunday 31st Aug 2014

EEEN41 MSG Dust RGB 31/08/2014 0745 UTC

## HIGH CONFIDENCE-

-No ash detected by Radar or by field scientists in the vicinity. No explosions reported.

-No lightning detected by Met Office ATDNet, implying no eruptive plume.

-Ash is currently not discernable on geostationary or polar orbiting satellite images due to frontal cloud.
