Notes

1. The 'meteorologists profile' series has run in the Royal Meteorological Society's Weather magazine for many years. Another excellent source of biographical information can be obituaries in Weather, Meteorological Magazine and many other journals. An article search of the catalogue for the name of the person should retrieve these.
2. In addition to biographies and collected work, many private weather diaries are held in the National Meteorological Archive, the earliest being 1731 for Rye in Sussex.
