

Bringing data to life

What will weather information look like in the future?

Examples of data visualisations

Design your own app!

Remember to consider:

- Who is your target audience?
- What is your app's name?
- What type of weather data will it show?
- What tools will it have?
- What problem will it solve?
- What's the USP? (Unique Selling point)
- How will the data be visualised?
