

Forecasting for the 2050s

Session 8

VIRTUAL

Science Camp 2021

- **Headline:** Here you can introduce yourself, give the date and the headline messages for the forecast
- **Today's Hotspot:** Today's highest temperature was in Worcester. Areas shaded in the darkest red are above 40 degrees.
- **Tonight:** What are the temperatures forecast to be overnight?
- **Bigger picture:** High pressure over the continent is drawing warm air over the UK. The low to the left might bring relief later in the weekend and next week.
- **Tomorrow:** For now though, the heatwave continues. How hot will it be tomorrow?

22nd JULY 2050

Extremely hot

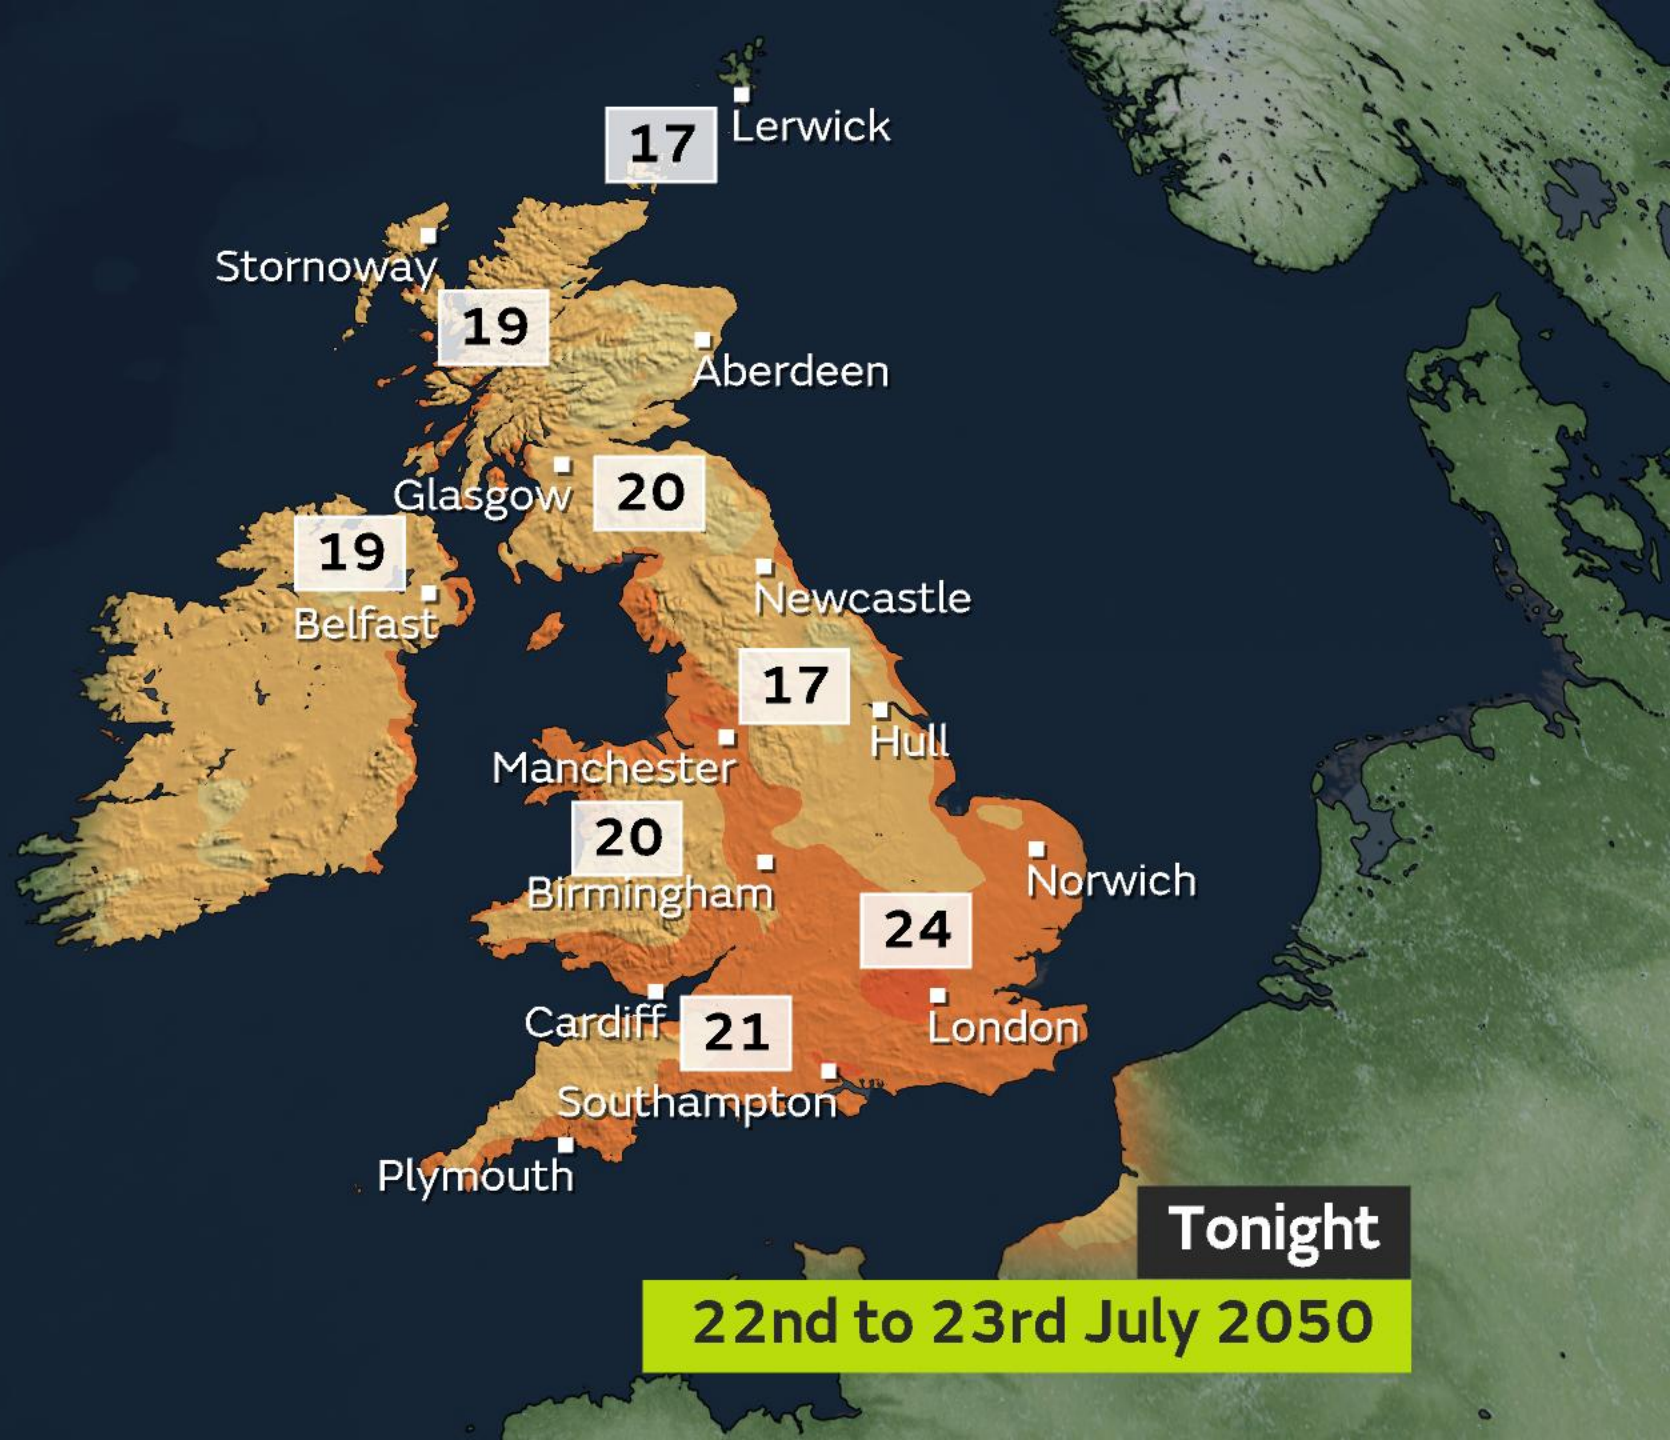

Turning cooler next week
