

Volcanic Ash – T+0 annotated satellite image *****EXERCISE*****

Issued 1500 UTC on Wed 15 Jan 2014

Plume clearly visible on sat pic originating from Eya. High confidence.

Single pilot report of ash at FL150 at 0030Z. Low confidence with no ash visible on sat pic and no other observations

Possible more diffuse ash visible from sat pic. Moderate confidence.

Possible ash but cloud is masking the signal. Moderate confidence
