

Volcanic Ash – T+0 annotated satellite image

Issued 0945 UTC on Thu 11 Dec 2014

EXERCISE VOLCICE

EEEN41 MSG Dust RGB 11/12/2014 0945 UTC

HIGH CONFIDENCE-

High confidence of presence of ash to FL590, visible on IMO mobile radar 50km east of Katla.

LOW CONFIDENCE-

Pilot report of ash at FL350 here at 11/0900Z. Not supported by satellite imagery or model output.

LOW CONFIDENCE-

Low confidence in ash in this ellipse due to obscuration by meteorological cloud. Ash suggested by model output only in this region.
