

Volcanic Ash – T+0 annotated satellite image

Issued 1230 UTC on Tue 09 Jan 2018

EXERCISE VOLCICE

EEEN41 MSG Dust RGB 09/01/2018 1200 UTC

LOW CONFIDENCE-

VA suggested by model winds and plume forecast. Radar indicates plume at 24km. However currently not visible due to frontal cloud, and ice on webcams, hence low confidence
