

# “Supporting Urban Intermediaries” to broker and design Weather and Climate Services with Urban Stakeholders in East Africa

## What SUI intends to do

- Improve access and enhance use of reliable weather and climate information
- Co-designing *weather climate information services* that are relevant for the *urban poor living in informal settlements* (Dar es Salaam/ Nairobi)
- To become more resilient, better prepared, enabled to take adaptive measures and ultimately to prevent losses

# “Supporting Urban Intermediaries” to broker and design Weather and Climate Services with Urban Stakeholders in East Africa

## Organisations
