Most Rainfall:

43.9 mm at Ceinws (Powys) and Abergynolwyn (Gwynedd)

Most Sunshine:

6.8 hours at Clacton-On-Sea (Essex)

General summary

England and Wales had a cloudy night with outbreaks of rain. However, during the night somewhat drier and clearer weather albeit with a few showers, especially across western areas, moved down from the north. It was a showery night across Scotland and Northern Ireland with blustery showers across many areas accompanied by gale or severe gale force winds which touched storm force at times across central and western Scotland during the early hours.

By dawn much of the persistent rain across southern areas had cleared away south-eastwards to leave behind a scattering of showers, some of which were on the heavy side with hail and thunder especially across western Scotland. Southern England and South Wales had a mainly dry morning with sunny spells.

Showers continued into the afternoon across northern and western districts and before nightfall more persistent rain had moved back into parts of southwest England. Elsewhere across eastern districts, apart from the odd isolated shower across northeast England, it was dry with clear spells.

It was a windy day generally and particularly so across Scotland with severe gale to storm force winds across the central region during the early hours.

It was a mild day initially across the United Kingdom but temperatures fell somewhat during the afternoon.

Significant weather event

- Gale damage was extensive in central Scotland, and Glasgow with gusts exceeding 90 knots in many places, was particularly badly hit
- 250,000 houses damaged in Scotland, leaving more than 2,000 people homeless
- 20 people dead across central Scotland, 9 in Glasgow alone

Highest gust speeds

	Gust speed	
	(knots)	(mph)
Great Dun Fell (Westmorland)	116	134
Tiree (Argyll)	102	118
Bell Rock (Angus)	96	111
Cairngorm (Inverness-shire)	93	107
Leuchars (Fife)	92	106
Turnhouse (Midlothian)	90	104
Prestwick (Ayrshire)	90	104
Abbotsinch (Renfrewshire)	89	103
