

# Key Successes from the UKCR Programme

A range of **new techniques, tools and datasets\*** that significantly **advance climate risk capability.**

Novel **arts-based and participatory approaches** to community engagement that builds locally relevant climate resilience.

**Place-based research** that translates knowledge into useful and useable climate services and plans for UK towns and cities.

A new **Climate Services Standard\*\*** and proposed **UK National Framework for Climate Services\*\*\*** to build coherence and quality.
