

1

RATIONALE

The global SSPs are five different storylines explaining how the global economy and society might evolve over the next 80 years

The UK-SSPs project has developed a pioneering set of extended and downscaled SSPs for the UK that is consistent with the global SSPs

METHOD

2

Key drivers underpinning UK societal development this century

Participatory approach to scenario development

- Highly interactive online stakeholder workshop
- Semi-structured interviews
- Questionnaire survey
- User Panel and Advisory Group

UK-SSP narratives describing evolution of events over time for the set of five scenarios

UK-SSP system diagrams visualising the interrelationships between drivers within each scenario

UK-SSP quantified projections for 25 socioeconomic indicators based on best available historical data and various downscaling approaches

Internal consistency between products was ensured by iterating the quantified projections multiple times with the narratives and semi-quantitative trends

UK-SSP semi-quantitative trends in 50 socioeconomic indicators

3

PRODUCTS

UK-SSP NARRATIVES

- Downscaled and extended set of five Shared Socio-economic Pathways (SSPs) for the UK

- Semi-quantitative trends

- System diagrams

QUANTIFIED PROJECTIONS

- Excel database, maps and accompanying User Manual

- Regridding tool for moving between different data spatial resolutions

INTERFACE TO EXPLORE EACH SCENARIO

- Insightmaker interfaces
