## April 2000 - Record rainfall

A consistently wet April has led to records being broken throughout the UK

## Introduction

## Record rainfall

A consistently wet April has led to records being broken throughout the UK.

According to the England and Wales precipitation series (an index which begins in 1766) the total was 143 mm(using best available data/estimates on 2 May 2000) making it the wettest April since records began. Previous highest April totals were in $1782(139 \mathrm{~mm}), 1818(136 \mathrm{~mm})$ and $1998(133 \mathrm{~mm})$. The chart below shows the series April 1766-2000.
